

① Data lake vs datawarehouse

- * In data lake ~~has~~ contains raw data. But in data warehouse contained cleaned and structured data.
- * In data lake usually process data when needed but in datawarehouse process data before use it.
- * Data lake contains unclear raw data and data warehouse contains high quality transformed data.

② Data sources.

~~Cctv~~ Camera data. We can get data from Cctv camera how many vehicals in that area.
~~extract~~ We can get. vehical number, type of the vehical, count can get vehical count. of each vehical type that pass the Cctv.

Traffic light sensors.-

- * Speed of the vehical
- * Vehical count
- * timestamp

User

③ ~~Data~~ Feedback. from hotel websites.

- * Spended time period
- * foods they eat
- *

Tripadvisor app data

- * Where ^{places that} people everytime vist
- * hotels they every time get food.
